

# ECE0XX6 WALL MOUNT USER MANUAL

(1) Adding 4\* 6#-32 threaded holes at the chassis bottom.

(2) Accessories:

<Mounting Bracket\* 1 pcs>

<6#-32\*L12Flat Head Screw\* 4 pcs>

(3) Pls place the bottom of the chassis upward and place the 4 screws to the correspondent holes at the bracket.

(4) Fastening the bracket to the chassis bottom with 4x 6#-32\* L12 screws; the side with bend of the bracket facing downward.

(5) Pls bolt 4\* M4 screws at the wall according to VESA spec; pls take note that the screw head shall not exceed 10mm in diameter.

(6) Pls take note that there shall be at least 2mm gap bet. the wall and the head of the screw for the bracket to fit in properly.

(7) Pls mount the bracket to the screw heads fastened on the wall (placing the screw heads inside of the calabash shape holes).

(8) Pls place the screw heads over the larger holes on the bracket and move downward to the smaller holes to station the bracket.

(9) The height of the chassis is adjustable by adjusting the position of the multiple calabash holes on the bracket.
